The Sanitary Wall Coating

To Practical Decorators

FOR PRACTICAL DECORATORS who use ALABASTINE we have prepared this list of original stencil designs which are peculiarly adpted to ALABASTINE work with its beautiful and delicate tints, susceptible as they are of being combined and intermixed. With a small line of stencils, work may be done at the same expense, more pleasing than wall paper effect to the property owner, and at the same time that will yield a better margin of profit than using wall paper, to the man who does the work.

Mixing for Two Color Effects

IN WALL TINTING, two color work is very popular. This can be produced by taking one of our regular colors for a side wall, taking the same color, mixing one part of color with from four to six parts of white ALABASTINE for the ceiling, or ceiling and frieze. One part color and six parts of white ALABASTINE mixed together makes very handsome ceiling and frieze effects, but if less contrast is desired a smaller amount of white, say four parts, may be used. This decorates the room in the same tone, lightening up the ceiling. In doing this the side wall color may be allowed to run clear to the ceiling, or the ceiling color may be dropped down on the side wall the width of a frieze and the colors separated by a gilt or colored line, or, what is more usual, a picture moulding. In this frieze running from 14 to 18 inches on an ordinary sized room, a nice stencil design can be put on at a very reasonable expense and most artistic effects are produced. This stencil may be in this case stenciled on with the side wall color. Another way is to take a certain color for the side wall and a certain color for the ceiling and frieze in the same manner as suggested.

The following colors go nicely together used in this way:

Ceiling No. 23 and Side Walls No. 20, 24, 29, 33, 48, 54, 56.

Ceiling No. 20 and Side Walls No. 24, 28, 31, 33, 48, 49, 54, 56.

Ceiling No. 26 and Side Walls No. 20, 24, 31, 33.

Ceiling No. 22 and Side Walls No. 21, 28, 29, 31, 56.

Ceiling No. 52 and Side Walls No. 28, 31, 33, 48, 54, 56.

Ceiling White and Side Walls No. 20, 21, 22, 23, 24, 26, 28, 29, 31, 52, 54.

An Endless Variety of Shades

THE ALABASTINE SHADES, in addition to being mixed with white, may be combined and intermixed to produce an endless variety of entirely new colors. In doing this the goods should be first prepared and stirred together dry, then water added according to directions. In experimenting by combining and intermixing for combination tints, only a very small amount is necessary. Mixed in different proportions dry, the dry color will be very near the color as it will come out on the wall after it has been applied.

A Corps of Artists at Your Bidding

THE ALABASTINE COMPANY has in its employ at all times a corps of artists whose services are free and at the disposal of any painter having work of this kind to do. In other words, if any painter has a house to decorate and will write the company, giving a diagram of the interior, giving size of rooms, including height and other information of this kind, without any expense the Company will have its artists prepare and submit color suggestions for the decorating of each room that people may know before they start just what colors they will secure. These suggestions will be made by using the regular tints put on paper with a brush, so it will be absolutely accurate.

THE ALABASTINE COMPANY also manufactures a complete line of the latest up-to-date positive or strong colors, reds, greens, blues, yellows, packed in one and four pound packages and will send circular on application.

What A Five Pound Package Will Do

A FIVE POUND PACKAGE of ALABASTINE will cover from 300 to 450 square feet, according to the nature of the surface. For a practical man doing a room or a building with ALABASTINE, a very small expenditure pays for the goods and the balance goes to him as pay for his skill in applying, while in hanging wall paper the bulk of the expenditure goes for paper, frieze, etc., and the small amount to the practical man.

WE ARE DESIROUS of interesting every painter in the use of ALABASTINE, are ready to help him in every way and can certainly show him that it is to his interest to advocate its use.

ALABASTINE is used largely in scene painting, and used by window trimmers where they work out handsome effects that cannot be produced in any other way.

WHEN ORDERING STENCILS be sure and order stencil from 3 to 5 inches narrower than space to be used in. That is when border is 18 inches wide, stencil should not be more than 12 to 15 inches wide. The number and width of pattern with price is marked und r each stencil.

Please enclose ten cents additional for postage and packing for all orders for 50 cents or less, and 15 cents on all orders over 50 cents and less than $1.00. Postage free on all orders $1.00 or over.

Alabastine Company

Grand Rapids, Michigan
105 Water St., New York City

How To Use Stencils

BEFORE STENCILS are shipped they are oiled for use. It is a good plan, however, to give them a coat of shellac as it adds to the life of the stencil.

IN USING FRIEZE PATTERNS the stencils should be pressed and held firmly against the wall and the material to be used for the stencil color rubbed over and through the cut out in the pattern.

A GOOD ROUND PAINT BRUSH will serve for filling the stenciling color—if a new brush the bristles may be tied about one-half way down to prevent the brush from spreading. The brush should be well filled with the color and wiped out on the side of the dish to avoid color running back of the stencil and smearing the wall.

WE SUGGEST to the inexperienced that they first try the work on some old wall or a piece of board.
